C.U.SHAH UNIVERSITY

Winter Examination-2018

Subject Name: Applied Physics

Subject Code: 4TE02APH1 Branch: B.Tech (All)

Semester: 2 Date: 25/10/2018 Time: 02:30 To 05:30 Marks: 70

Instructions:

- (1) Use of Programmable calculator & any other electronic instrument is prohibited.
- (2) Instructions written on main answer book are strictly to be obeyed.
- (3) Draw neat diagrams and figures (if necessary) at right places.
- (4) Assume suitable data if needed.

Q-1 Attempt the following questions:

(14)

- a) Draw the Symbol of ordinary PN Junction Diode.
- **b)** Draw the symbol of Zener Diode.
- c) The ordinary P-N junction diode passes the charge carriers in the forward direction and blocks the charge carrier in the reverse direction.
 - The above statement is True/False. (Select correct option)
- d) The Zener diode is designed to work in the reverse bias and break down region .
 - The above statement is True/False. (Select correct option)
- e) The Aluminum is used as P type impurity to be added with pure silicon material.
 - The above statement is True/False. (Select correct option)
- f) State any two application of ordinary PN junction diode.
- **g**) Draw the symbol of Transistor.
- **h**) The transistor can be used as an amplifier.
 - The above statement is True/False. (Select correct option)
- i) The diode can be used as a rectifier.
 - The above statement is True/False. (Select correct option)
- j) The forward voltage drop of ordinary PN junction diode is 0.7 V.
 - The above statement is True/False. (Select correct option)
- **k)** State the full name of MOSFET.
- 1) List any two applications of laser
- m) Today's mobile technology use fiber optic cable infrastructure.

n) Give any two advantages of fiber optic communication.

Attem	pt any	four questions from Q-2 to Q-8	
Q-2		Write short notes on:	(14)
	(a)	Zener Diode.	07
	(b)	PN junction diode.	07
Q-3		Attempt all questions	(14)
	(a)	For a semiconductor, explain what is drift current and diffusion current?	07
	(b)	Briefly Explain about P- type semiconductors.	07
Q-4		Write short notes on:	(14)
	(a)	Half wave rectifier.	07
	(b)	LED and Tunnel Diode.	07
Q-5		Attempt all questions	(14)
	(a)	Briefly List the type of Transistors and type of MOSFET used for electronics	07
		application. Draw their output characteristic.	
	(b)	Write short note on Bridge rectifier.	07
Q-6		Attempt all questions	(14)
	(a)	Draw the common base and common emitter configuration of transistor. State	07
		how these transistors act in both the modes?	
	(b)	Briefly explain about gain alpha and beta in case of transistor. Derive the relation	07
		between the two gain.	
Q-7		Attempt all questions	(14)
	(a)	With the help of energy band diagram explain energy band theory.	07
	(b)	Explain voltage divider biasing circuit for transistor.	07

Q-8		Attempt all questions	
	(a)	Explain the concept of forward bias and reverse bias of diode with suitable	07
		sketch.	
	(b)	Explain various types of optical fiber configuration.	07
