	·	t the following question			
1 a)	Attempt Give the	t the following questio full form of EM wave	ons:		
1	Attempt Give the	t the following question full form of EM wave llows nature.	ons:	Jone	
a) b)	Attempt Give the Light fol	t the following question full form of EM wave llows nature. i) Particle ii) Wave	ons: es. e iii) Both particle and wave iv) N		
1 a)	Attempt Give the Light fol Mention	t the following question full form of EM wave llows nature. i) Particle ii) Wave	ons:		
a) b) c) d) e)	Attempt Give the Light fol Mention Define R What do	t the following question full form of EM wave llows nature. i) Particle ii) Wave any one difference between the lower services and the lower services are proposed to the lower services and the lower services are proposed to the lower services are propos	es. e iii) Both particle and wave iv) Notween monochromatic and polych		
a) b) c) d) e) f)	Attempt Give the Light fol Mention Define R What do Explain	t the following question full form of EM wave llows nature. i) Particle ii) Wave any one difference between the lower section in the phrase "Superposition of the phrase" of the phrase "Superposition of the phrase "Superposition of the phrase" of the phrase "Superposition of the phrase "Superpositi	es. e iii) Both particle and wave iv) Notween monochromatic and polych		
a) b) c) d) e) f) g)	Attempt Give the Light fol Mention Define R What do Explain Define V	t the following question of EM wave full form of EM wave flows nature. i) Particle ii) Wave any one difference beto defractive Index. you mean by a Zone puthe phrase "Superposit Wave front.	es. e iii) Both particle and wave iv) Notween monochromatic and polychelate? etion of two waves".		
a) b) c) d) e) f) g) h)	Attempt Give the Light fol Mention Define R What do Explain Define V What do	t the following question of EM wave full form of EM wave flows nature. i) Particle ii) Wave any one difference between the phrase "Superposit Wave front. by you understand by the	es. e iii) Both particle and wave iv) Notween monochromatic and polychelate? etion of two waves".		
a) b) c) d) e) f) h) i)	Give the Light fol Mention Define R What do Explain Define What do What is	t the following question full form of EM wave flows nature. i) Particle ii) Wave any one difference between the following and a Zone particle phrase "Superposit Wave front. you understand by the Doppler effect?	es. e iii) Both particle and wave iv) Notween monochromatic and polychelate? etion of two waves".		
a) b) c) d) e) f) g) h) i)	Give the Light fold Mention Define R What do Explain Define What do What is What are	t the following question of EM wave full form of EM wave flows nature. i) Particle ii) Wave any one difference beto a constitute and a zone put the phrase "Superposit Vave front. by you understand by the Doppler effect? e acoustic waves?	es. e iii) Both particle and wave iv) Notween monochromatic and polychelate? tion of two waves".		
a) b) c) d) e) f) h) i)	Give the Light fold Mention Define R What do Explain Define What do What is What are Explain	t the following question full form of EM wave flows nature. i) Particle ii) Wave any one difference between the following and a Zone particle phrase "Superposit Wave front. you understand by the Doppler effect?	es. e iii) Both particle and wave iv) Notween monochromatic and polychelate? tion of two waves".		
a) b) c) d) e) f) j) k)	Give the Light fold Mention Define R What do Explain Define What do What is What are Explain What are	t the following question of EM wave full form of EM wave flows nature. i) Particle ii) Wave any one difference between the phrase "Superposit Wave front. you mean by a Zone puthe phrase "Superposit Wave front. you understand by the Doppler effect? e acoustic waves? the concept of Polariza	e iii) Both particle and wave iv) Netween monochromatic and polychelate? Tion of two waves". The term "Aperture"?		

Atte

Q-2		Attempt all questions	(14)
a	a)	Define Diffraction process. Name the two types of Diffraction. Explain in detail	(07)
		Fresnel diffraction.	
	b)	Define Fraunhoffer diffraction and explain in detail the intensity pattern of light at a	(07)
		single slit with a proper figure.	
Q-3		Attempt all questions	(14)
_	a)	Explain with suitable diagram the Huygen's principle.	(06)

	b)	What is interference of light? Name the two types of interferences. Explain the	(08)
		division of amplitude and wave front with proper examples.	
Q-4		Attempt all questions	(14)
	a)	A plane wave front of light of wavelength 5000A ⁰ falls on an aperture and the diffraction pattern is observed in an eyepiece at a distance of 1 meter from the aperture. Find the radius of the 100 th half period element and the area of a half period	(07)
		zone.	
	b)	A zone plate has focal length 50 cm at a wavelength $6000A^0$. What will be its focal length $\Lambda = 5000A^0$.	(07)
Q-5		Attempt all questions	(14)
	a)	Explain in detail the conditions to be followed for light to undergo constructive and destructive interferences in terms of phase and path difference.	(07)
	b)	Explain the principle, construction and working of a Michelson's interferometer.	(07)
Q-6		Attempt all questions	(14)
	a)	Explain the concept of Lissajous figures.	(07)
	b)	State and explain the principle of superposition of two perpendicular harmonic oscillations.	(07)
Q-7		Attempt all questions	(14)
	a)	State the Bragg's law of Diffraction. What is the difference between interference and diffraction?	(06)
	b)	Explain in detail the principle, construction and working of a Fresnel biprism with suitable figure.	(08)
Q-8		Attempt all questions	(14)
	a)	Briefly explain the Young's double slit experiment.	(07)
	b)	Explain the image formation in Lloyd's Mirror.	(07)
