

C. U. SHAH UNIVERSITY

Wadhwan City

FACULTY OF:- Computer Science

DEPARTMENT OF:- Master of Computer Application

SEMESTER:- -I

CODE:- - 5CS01FCP1

NAME:- – Fundamentals of C Programming

Teaching and Evaluation Scheme:-

Subject Code	Name of the Subject	Teaching Scheme (Hours)				Credits	Evaluation Scheme								
		Th	Tu	Pr	Total		Theory				Practical (Marks)				Total
							Sessional Exam		University Exam		Internal		University		
							Marks	Hrs	Marks	Hrs	Pr/Viva	TW	Pr		
5CS01FCP1	Fundamentals of C Programming	4	-	-	4	4	30	1.5	70	3	---	---	---	100	

Objectives:-

- The aim of this course is to introduce to the students the rudiments of structured programming using C language.
- Students will become familiar with problem solving techniques and algorithm development

Prerequisite:-

Any programming language like C

Course Outline:-

SNo.	Course Contents	Number of Hours
1	Introduction of C : Tokens, Operators and Expressions, Operators precedence & associativity	05
2	Decision making & Branching : If, if-else, nested if-else, switch-case, For, Do-While, While Loop	05
3	Arrays : Introduction, one dimensional array, two dimensional arrays and multi-dimensional array, array to string	05
4	String Handling: Overview & Declaration of string, String-handling functions, String as array	05
5	Structures : Declaration, usage of structure, nested, structures, Union and its usage, structure to array	06
6	Function : Definition, using functions, recursion, command line arguments	06
7	Pointers : Declaring and initializing pointers, Array and Pointers, Pointers, and strings, Pointer	06

C. U. SHAH UNIVERSITY **Wadhwan City**

	to Pointer, Pointers and functions	
8	File Management : High level I/O Functions, Defining & Opening File, I/O Operation on File, Error Handling during I/O Operations, Command Line Arguments, Dynamic Memory Allocation, Allocating a Block Memory	07
Total Lecture		45

Learning Outcomes:

- After completion of the course students should become reasonably good at problem solving and algorithm development. They would become capable of solving problems using computers through C programming language.

Teaching & Learning Methodology:

Using Whiteboard & Multimedia or OHP

Books Recommended:

1. Programming in ANSI C, **E. Balaguruswami**
2. Classic Data Structures , **Debasis Samanta**, PHI

Reference Book:

1. Programming in C, **Pradip Dey & Manas Ghosh**, Publisher – Oxford
2. Expert Data Structures With C, **Dr. R.B. Patel**, Publisher-Khanna Publications
3. Data Structure Using C and C++, **Y kanitkar**, Publisher-PHI
4. Let us C, **Yashwant Kanitkar**, Publisher – BPB Publication

C. U. SHAH UNIVERSITY
Wadhwan City

FACULTY OF:- Computer Science

DEPARTMENT OF:- Master of Computer Application

SEMESTER:- -I

CODE:- - 5CS01DBS1

NAME:- – Database Management System

Teaching and Evaluation Scheme:-

Subject Code	Name of the Subject	Teaching Scheme (Hours)				Credits	Evaluation Scheme							
		Th	Tu	Pr	Total		Theory				Practical (Marks)			Total
							Sessional Exam		University Exam		Internal		University	
							Marks	Hrs	Marks	Hrs	Pr/Viva	TW	Pr	
5CS01DMB1	Database Management System	4	-	-	4	4	30	1	70	3	-	-	---	100

Objectives

- This course is designed to make student familiar with the fundamental concepts of DBMS for designing and implementing database systems by using the tools like SQL..

Prerequisites

Basic knowledge of working with computer.

Course Outline

Sr. No.	Course Contents	Number of Hours
1	<p>Database Concepts and Architecture</p> <p>Preliminary concepts: data, database, database systems, database management systems, Components of database system, Functions of DBMS</p> <p>Characteristics and elements of database system</p> <p>Schema, Instance and Database State Database Applications, Purpose and Advantages of Database Management System (over file systems), View of Data (Data Abstraction, Data Models) Data Storage and Querying (Components, Storage Manager, Query Processor)</p> <p>Database Architecture (Client/Server and Three Tier Architecture) Database User and Administrators</p>	10
2	<p>Features of Entity Relationship Diagram</p>	10

C. U. SHAH UNIVERSITY
Wadhwan City

	Entity Relational Model (Entity Sets, Relationship Sets, Attributes), Constraints (Mapping Cardinalities, Keys, Participation Constraints), Entity Relationship Diagram, Weak Entity Set, Extended E-R Features (Generalization, Specialization and Aggregation), E-R Notations Examples of ERD	
3	Relational Model and Database Design Relational structure – tables (relations), rows (tuples), domains, columns (attributes) Database design process, Anomalies in a database Functional Dependencies (Definition, Types of Functional Dependency) Decomposition: (Definition, Loosy Decomposition, Lossless join decomposition, Dependency preserving decomposition) Closure set of FD, Canonical Cover Normalization up-to 3NF	12
4	Introduction to SQL Basic Data Types of ORACLE Data Definition Language (DDL) Data Manipulation Language (DML) Data Control Language (DCL) Transaction Control Language (TCL) Data Constraints, Inbuilt Functions Subqueries, Join, Indexes, Views, Sequences, Synonyms, Set Operators ORACLE Utility – Import, Export	10
5	Relational Algebra Native Relational Operations (Selection, Projection, Join, Difference) Additional Operations (Rename, Assignment, Generalized Projection, Aggregation) Relational Algebra Examples	08
Total hours		50

Learning Outcomes

- Enable the student to model the real world data into database framework.
- Creation of conceptual design using tools like E-R Diagram.
- Clear understanding of how to map the logical design of database into physical design.
- To get familiar with the SQL query environment.
- Representation of queries into equivalent relational algebraic expression

C. U. SHAH UNIVERSITY

Wadhwan City

Books Recommended:-

1. Database System Concepts, **Silberschatz, Korth, Sudarshan**, 5th Edition, Publisher-McGraw Hill Publication
2. Fundamentals of Database Systems, **Elmsari, Navathe**, 5th Edition, Publisher-Pearson Education (2008)
3. An Introduction to Database Systems, **C J Date, A Kannan, S Swaminathan**, 8th Edition, Publisher-Pearson Education (2006)

C. U. SHAH UNIVERSITY
Wadhwan City

FACULTY OF:- Computer Science
DEPARTMENT OF:- Master of Computer Application
SEMESTER:- -I
CODE:- - 5CS01BCO1
NAME:- – BASICS OF COMPUTER ORGANIZATION

Teaching and Evaluation Scheme:-

Subject Code	Name of the Subject	Teaching Scheme (Hours)				Credits	Evaluation Scheme							
		Th	Tu	Pr	Total		Theory				Practical (Marks)			Total
							Sessional Exam		University Exam		Internal		University	
							Marks	Hrs	Marks	Hrs	Pr/Viva	TW	Pr	
5CS01BCO1	BASICS OF COMPUTER ORGANIZATION	4	-	-	4	4	30	1	70	3	-	-	-	100

Objectives:

- To be able to understand the concepts of Computer Basics
- To Develop Proficiency in Creating Circuits Designing.

Prerequisites:

- Knowledge of Basic Computer Fundamentals

Course Outline

Sr. No.	Course Contents	Hours
1	Basics of Computer Introduction to Computer, block diagram of digital computer, Input-output devices (VDU, scanner, mouse, keyboard, printer, plotter, Joystick, multimedia projector)	3

C. U. SHAH UNIVERSITY
Wadhwan City

2	<p>Number System</p> <p>(I) Basics of Number System Introduction, Binary Number System, Decimal Number System Conversions Of Binary, Decimal, Octal, Hexadecimal number system</p> <p>(II) Binary Operations in number system Binary Addition, subtraction, multiplication, Division</p> <p>(III) Complements in Number system 1's Complements, 2's Complements, n's complement Binary Addition & Subtraction using complements</p> <p>(IV) Binary Number System Codes Weighted and Non-weighted codes BCD Code: Excess Three (XS-3) Code Gray Code: Binary to Gray & Gray to Binary</p>	8
3	<p>Boolean Algebra</p> <p>Introduction of Boolean algebra, Boolean Expression & Boolean Function Operations of Boolean algebra, Laws of Boolean algebra, De Morgan's law Perfect induction Method, Simplification of Boolean Expressions</p>	7
4	<p>Application of Logic Gates & Boolean Algebra</p> <p>Introduction to Gate, Types of Gate, Universal Gate (Proof of Universal gate) Duality in Boolean algebra, Draw the logical Circuit using Gates, Sum of Product & Product of Sum, MAP Method for simplifying Expressions K' MAP, K' MAP with don't care Condition (2 variables, 4 variables)</p>	6
5	<p>Combinational Circuit</p> <p>Introduction of Combinational Circuit, Half Adder, Full adder, BCD Adder (4-bit), Parallel Binary Adder, Half Subtractor, Full subtractor Decoder (Binary To Octal Converter), encoder, Decoder using NAND Gate, Multiplexer, DeMUX</p>	5
6	<p>Sequential Circuit</p> <p>Sequential Circuit, Differentiate Circuit differ from Combinational Circuit, Flip flop Introduction, using NAND & NOR gates., SR flipflop using NAND & NOR gates (with truth table), JK Flipflop (with truth table), Master-slave JK Flipflop, Registers, Types of Registers, Counters, Binary Counters, Asynchronous Binary Counter</p>	8

C. U. SHAH UNIVERSITY **Wadhwan City**

7	Memory Unit What is Memory? Types of Memory(Memory Hierarchy),RAM,ROM,RAM V/s ROM, Secondary Storage Memory(Harddisk, floppy disk, Magnetic Disk), Cache Memory, Virtual Memory	3
8	CPU & I/O Organization Stack Organization (Intro.),Instruction Formats,Addressing modes Asynchronous Data Transfer,Modes of Transfer,Direct Memory Access(DMA), Addressing Modes	7
9	Basics of Microprocessor Introduction to Microprocessor, Introduction To 8086 Microprocessor Instruction & pin Diagram of 8086 Microprocessor	3

Learning Outcomes

To impart knowledge on

Understand the basic concepts of machines and mechanisms.

Draw velocity and acceleration diagrams of various mechanisms.

Build up critical thinking and problem solving capacity of various mechanical engineering problems related to kinematics of machines.

Asses various concepts of mechanisms like straight line motion mechanisms, Steering gear mechanisms and working principles of power elements (Gears, gear trains, Cams, Belt and Chain drives) and design related problems effectively.

Books Recommended:-

1. **Shigley, J.E and Uicker, J.J:** Theory of Machines and Mechanisms, Oxford University Press
2. **Rattan S.S.:** Theory of Machines Tata McGraw-Hill Publishing Co. Ltd. New Delhi,
3. **Rao J.S. and Dukkupati R.V:** Mechanisms and theory Machines theory, Wiley Eastern Ltd.
4. **Mabie H.H and Ocvirk, F.W:** Kinematic and Dynamics of Machinery,3rd Edition ,John wiley and sons.
5. **Green, W.G:** Theory of Machines, 2nd Edition, Blackie, London, 1992.
6. **Hollowenko, A.R:** Dynamics of Machinery, John wiley and sons. Inc. New York, 1955.
7. **Wilson,** Kinematics and Dynamics of Machinery, 3rd Edition, Pearson Education.
8. **Bevan Thomas,** Theory of Machines
9. Theory of Machines by **R.S.Khurmi** S.Chand

C. U. SHAH UNIVERSITY
Wadhwan City

FACULTY OF:- Computer Science
DEPARTMENT OF:- Master of Computer Application
SEMESTER:- -I
CODE:- - 5CS01MAT1
NAME:- -MATHEMATICS FOR COMPUTER SCIENCE

Teaching and Evaluation Scheme:-

Subject Code	Name of the Subject	Teaching Scheme (Hours)				Credits	Evaluation Scheme							
		Th	Tu	Pr	Total		Theory				Practical (Marks)			Total
							Sessional Exam		University Exam		Internal		University	
							Marks	Hrs	Marks	Hrs	Pr/Viva	TW	Pr	
5CS01MAT1	Thermodynamics	4	-	-	4	4	30	1	70	3	---	---	---	100

Objectives:-

- The objective of this course is to present the foundations of many basic computer related concepts and provide a coherent development to the students for the courses.
- This course will enhance the student’s ability to think logically and mathematically.

Prerequisites:-

Knowledge of basic concepts on Sets, different operations on sets, binary operations, functions.

Course outline:-

Sr. No.	Course Contents	Number of Hours
1	Introduction Importance & Purpose of Discrete Mathematical Structures; Applications; Set Theory, Functions, Relations, etc.	6
2	Mathematical Logic: Introduction, Connectives, statement formulas, principle of substitution, validity of arguments, Quantifiers, Proof techniques.	8

C. U. SHAH UNIVERSITY
Wadhwan City

3	Lattices: Relation and ordering, partially ordered sets, Lattices as poset, properties of lattices, Lattices as algebraic systems, sub-lattices, direct product and homomorphism, complete lattices, bounds of lattices, distributive lattice, complemented lattices.	8
4	Boolean Algebra: Introduction, definition and important properties of Boolean Algebra, Sub Boolean algebra, direct product and homomorphism, join-irreducible, meet-irreducible, atoms, anti atoms	8
5	Applications of Boolean Algebra: Boolean expressions and their equivalence, Minterms and Maxterms, Free Boolean algebra, Values of Boolean expression, canonical forms, Boolean functions, representation of Boolean function, Karnaugh maps, minimization of Boolean function, Quine-Mccluskey algorithm, Application to Relational Database.	12
6	Graph Theory: Basic concepts of Graph theory, paths, reachability and connectedness, matrix representation of graph, trees.	10
Total hours		52

Learning Outcomes: -

- The student will be able to apply concepts to RDBMS, perform minimization of Boolean functions, shall learn the fundamentals representations methods of graphs and trees.
- They shall be able to use different logical reasoning to prove theorems.

Books Recommended:-

1. Discrete Mathematical Structures with Applications to Computer Science, **J. P. Tremblay and R. Manohar**, Publisher-Tata McGraw-Hill
2. Discrete Mathematical Structure, **D. S. Malik, M. K. Sen**, Publisher-Cengage Learning

C. U. SHAH UNIVERSITY
Wadhwan City

FACULTY OF:- Computer Science
DEPARTMENT OF:- Master of Computer Application
SEMESTER:- -I
CODE :- 5CS01CSD1
NAME – COMMUNICATION & SOFT SKILLS DEVELOPMENT

Teaching and Evaluation Scheme:-

Subject Code	Name of the Subject	Teaching Scheme (Hours)				Credits	Evaluation Scheme							
		Th	Tu	Pr	Total		Theory				Practical (Marks)			Total
							Sessional Exam		University Exam		Internal		University	
							Marks	Hrs	Marks	Hrs	Pr/Viva	TW	Pr	
5CS01CSD1	COMMUNICATION & SOFT SKILLS DEVELOPMENT	4	2	-	6	5	30	1	70	3	50	-	-	150

Objectives:-

- The purpose of this course is to develop the students’ competence in communication at an advanced level. Assuming that the students are fairly proficient in the basic communication skills of listening, speaking, and reading & writing in English.
- To give a global competitive edge to the students by way of honouring their professional communication skills.
- To enhance the employability skills of the students.
- To make them aware of the process of interview and competencies required.
- To train them to prepare career oriented contributor profile..

Prerequisites:-

Students should have basic knowledge of English language and grammar.
 Students should have ability to speak and write correct sentence in their day to day language.
 Students should be familiar with correct usage of language.
 Students should have basic knowledge of professional communication..

Course outline:-

Sr. No.	Course Contents	Number of Hours
1	Features of Indian English Communication: Correction of sentences – Informal conversation Vs Formal expression – Verbal and non-verbal communication, barriers to effective communication – kinesics – Types of	5

C. U. SHAH UNIVERSITY Wadhwan City

	communication – Listening, Speaking, Reading and Writing, Telephone etiquette.	
2	Technical presentations: Types of presentation – video conferencing – participation in meeting – chairing sessions – Formal and informal interviews – interviewing in different setting and for different purposes recruiting, performance appraisal, Public Speaking, Debate and Group Discussion.	5
3	Written communication – differences between spoken and written communication – features of effective writing such as clarity and brevity.	6
4	Letter-writing – business letters – pro-forma culture – format – style – effectiveness, promptness - Analysis of sample letters collected from industry – email, fax.	6
5	Technical Report writing – Business and Technical Reports Types of reports – progress reports, routine reports – Annual reports – format – Analysis of sample reports from industry – Synopsis and Dissertation writing.	12
6	Personality development, personal grooming and soft skills	4
7	Employability skills	4
8	Interviews	4
9	Resume Writing	4
Total hours		48

Learning Outcomes:-

- Develop their personality and personal grooming to work effectively at workplace.
- Be able to prepare their resume in highly contributor manner and develop their employability skills, for interview and technical report writing.

Teaching Methodology:

The teaching will be made effective through interactive class room approach.

Different kind of soft skills will be improved through drilling method.

Active and inactive resources such as Audio & Video-CDs will be utilize for effective teaching learning process

Books Recommended:-

1. Essentials of Business Communication
2. Basic Communication Skills for Technology
3. Business Communication
4. English for Technical Communication – vols. 1 and 2

C. U. SHAH UNIVERSITY
Wadhwan City

5. Writing Remedies: Practical Exercises for Technical Writing

C. U. SHAH UNIVERSITY
Wadhwan City

CODE:- 5CS01FCP2
NAME:- PROGRAMMING TECHNIQUE-I (FCP)

Teaching and Evaluation Scheme:-

Subject Code	Name of the Subject	Teaching Scheme (Hours)				Credits	Evaluation Scheme							
		Th	Tu	Pr	Total		Theory				Practical (Marks)			Total
							Sessional Exam		University Exam		Internal		University	
							Marks	Hrs	Marks	Hrs	Pr/Viva	TW	Pr	
5CS01FCP2	PROGRAMMING TECHNIQUE-I (FCP)	-	-	4	4	2	-	-	-	-	20	---	80	100

Objectives:-

- The aim of this course is to introduce to the students the rudiments of structured programming using C language.
- Students will become familiar with problem solving techniques and algorithm development.

Prerequisites:-

Any Programming language like C

Course outline:-

Sr. No	Course Contents	Number of Hours
1	W.A.P to add, multiply, divide two integer and float numbers, W.A.P to accept no of days and print year, month and remaining days	2
2	W.A.P to check whether entered number is prime or not, W.A.P to check whether entered number is odd or even	4
3	Print Series 2,4,16,...,n*n using shorthand operator and while loop	6
4	W.A.P to generate Fibonacci number, W.A.P to find a factorial of entered number	8
5	W.A.P to print multiplication table	10
6	W.A.P to print all the numbers and sum of all the integers that are greater than 100 and less than 200 and divisible by 7	12
7	W.A.P to find roots of equation $ax^2+bx+c=0$	14
8	W.A.P to print following output	16

C. U. SHAH UNIVERSITY
Wadhwan City

	<pre> a b c d e a b c d a b c a b a W.A.P to print the following output. 1 2 3 4 5 6 7 8 9 10 . . 71.....91 </pre>	
9	W.A.P to find the maximum & minimum value from entered array	18
10	W.A.P to sort given array into ascending & descending order	20
11	Write a program to add, subtract & multiply two matrices	22
12	Write a program that will read text and count all occurrence of a particular word, Write a program that append one string to another string	24
13	Write a program to use recursive calls to evaluate $f(x) = x() - x(3)/3! + x(5)/5! - x(7)/7!$	26
14	Write a Program using function to count the simple interest	28
15	Write a Program to create structure of Student Detail like Roll no, name, address and Mobile no and display the records.	30
16	Write in a program declare the following Structure members: Name, code, age, weight, height. Read all the members of the structure for 100 persons and the find the list of persons with all related data whose weight >50 and height >40 and print the same with the suitable format and title	32
17	Write a program that demonstrate the use of address(&) and pointer(*) operators	34
18	W.A. P to reverse a string using pointer	36
19	W.A.P to read the content of a file and display the same on screen	38
20	W.A.P. to read the content of a file and store the same content in another file.	40

1

➤ **Create the following tables:**

1. Create LOCATION Table with columns Location_Id, Regional_Group.

Constraints on LOCATION table: Location_Id Primary Key.

2. Insert the following records into the table LOCATION:

LOCATION_I D -----	REGIONAL_GROUP -----
	--
122	NEW YORK
123	DALLAS
124	CHICAGO
167	BOSTON

3. Create DEPARTMENT Table with columns Department_Id, Name, Location_ID.

Constraints on DEPARTMENT table: Department_Id Primary Key, Location_Id references LOCATION table.

4. Insert the following records into DEPARTMENT table:

DEPRATMENT_I D -----	NAME -----	LOCATION_I D -----
-	---	---
10	ACCOUNTIN G	122
20	RESEARCH	124
30	SALES	123
40	OPERATIONS	167

5. Create JOB Table with columns Job_Id, Funcation.

Constraints on JOB table: Job_ID Primary Key.

6. Insert the following records into JOB table:

JOB_ID	FUNCTION
--------	----------

C. U. SHAH UNIVERSITY Wadhwan City

```

-----
667          CLERK
668          STAFF
669          ANALYST
670          SALESPERSON
671          MANAGER
672          PRESIDENT
  
```

7. Create EMPLOYEE Table with columns Employee_Id, Last_Name, First_Name, Middle_Name, Job_Id, Manager_Id, Hire_Date, Salary, Comm, Department_ID.

Constraints on EMPLOYEE table: Employee_Id Primary Key, Last_Name NotNull, Department_Id references DEPARTMENT table.

8. Insert the following records into EMPLOYEE table:

EMPLOYEE_ID	LAST_NAME	FIRST_NAME	MIDDLE_NAME	JOB_ID	MANAGER_ID	HIRE_DATE	SALARY	COMM	DEPARTMENT_ID
---	-----	-----	-	-	---	-----	-----	---	-----

2

➤ **Perform the following queries on the tables given in Set no. 1:**

1. **List all job details.**
2. **List all the locations.**
3. **List out first name,last_name,salary, commission for all employees.**
4. **List out employee_id,last_name,department_id for all employees and rename employee_id as “ID of the employee”, last_name as “Name of the employee”, department_id as “department ID”.**
5. **List out the employee’s annual salary with their names only.**
6. **List out the employees who are working in department 20.**
7. **List out the employees who are earning salary between 3000 and 4500.**
8. **List out the employees who are working in department 10 or 20.**
9. **List out the employees whose name starts with “S”.**
10. **List out the employees whose name length is 4 and start with “S”**

C. U. SHAH UNIVERSITY
Wadhwan City

3	<p>➤ Perform the following queries on the tables given in Set no. 1:</p> <ol style="list-style-type: none">1. List out the employee id, last name in ascending order based on the employee id.2. List out the employee id, name in descending order based on salary column.3. List out the employee details according to their last_name in ascending order and salaries in descending order.4. List out the employee details according to their last_name in ascending order and then on department_id in descending order.5. How many employees who are working in different departments wise in the organization6. List out the department wise maximum salary, minimum salary, average salary of the employees7. List out the no. of employees for each month and year, in the ascending order based on the year, month.8. List out the department id having at least four employees.9. How many employees in January month.10. Which is the department id, having greater than or equal to 3 employees joined in April 1985.
4	<p>➤ Perform the following queries on the tables given in Set no. 1:</p> <ol style="list-style-type: none">1. Display the employee who got the maximum salary.2. Display the employees who are working in Sales department.3. Display the employees who are working as “Clerk”.4. Find out no. of employees working in “Sales” department.5. List our employees with their department names.6. Display employees with their designations (jobs).7. How many employees who are working in different departments and display with department name.8. How many jobs in the organization with designations.9. Display employee details with all departments.10. List out the common jobs in Research and Accounting Departments in ascending order.
5	<p>➤ Create the following tables:</p>

C. U. SHAH UNIVERSITY

Wadhwan City

1. Create STUDENT Table with fields rollno, name, class, birthdate

Constraints on STUDENT table: rollno primary key and rollno must start with letter 'R'.

2. Insert the following records into Student Table:

ROLLNO	NAME	CLASS	BIRTHDATE
R1	Pritesh Patel	A	23-FEB-89
R2	Sugeet Patel	A	05-SEP-85
R3	Dipesh Patel	B	24-MAR-76
R4	Chandresh patel	B	17-APR-87
R5	Bhavin Jilvaani	A	25-DEC-75

3. Create COURSE Table with fields courseno, coursename, max_marks, pass_marks

Constraints on COURSE table: courseno primary key, check for max_mark>0, also check for pass_mark>0 and pass_marks<max_marks.

4. Insert the following records into Course Table:

COURSENO	COURSENAME	MAX_MARKS	PASS_MARKS
610001	FOP	90	40
610002	FOP Prac	90	40
610003	MATHS	90	40
610004	COMP ORG	90	40
610005	DBMSI	90	40
610006	SQL & PL/SQL	90	40
610007	ERFM	90	40

1. Create SC Table with fields rollno, courseno, marks:

Constraints on Sc table: marks must be greater than 0, rollno, courseno primary key, rollno references students and couseno references course.

C. U. SHAH UNIVERSITY
Wadhwan City

2. Insert the following records into SC Table:

ROLLNO COURSENO MARKS

6	<p>➤ Perform the following queries on the tables given in Set no. 5:</p> <ol style="list-style-type: none">1. Add constraint that marks entered are between 0 to 100 only.2. While creating COURSE table, primary key constraint was forgotten. Add the primary key now.3. Display details of student where course is ‘Data Base Management System’4. Select student names who have scored more than 70% in Computer Networks and have not failed in any subject.5. Select names and class of students whose names begin with ‘A’ or ‘B’.6. Display average marks obtained by each student.7. Select all courses where passing marks are more than 30% of average maximum marks.8. Select the course where Second and third characters are ‘AT’9. Display details of students born in 1975 or 1976.10. Find out the cousewise average marks from SC table.
7	<p>➤ Perform the following miscellaneous queries:</p> <ol style="list-style-type: none">1. Add 15 days to current date.2. Add and subtract 5 months from current month.3. Calculate months between current months and ‘3-7-2008’4. Find last day of current month.5. How many days left in a current month?6. Find ASCII value of letter ‘R’.7. Find name of all constraint based on particular table.8. Find difference between current date and specified date.9. Find username and userid from current login.10. Find the occurrence of ‘or’ in the string.

C. U. SHAH UNIVERSITY
Wadhwan City

8

➤ **Create the following tables:**

1. Create the table SCREEN with the fields (screen_id, location, seating_cap)

Constraints on SCREEN table: screen_id primary key, location not null, seating_cap not null, Screen_Id must start with S, location values must be either FF,SF or TF, seating_cap must be greater than 0.

2. Insert the following records into SC Table:

SCREEN ID		
-----	-----	-----
S1	SF	400
S2	TF	350
S3	TF	250
S4	SF	300
S5	TF	170

3. Create the table MOVIE with the fields (movie_id, movie_name, date_of_release)

Constraints on MOVIE table: movie_id primary key, movie_name unique, date_of_release not null.

4. Insert the following records into the table MOVIE:

MOVIE ID		
-----	-----	-----
M01	Star Wars III	11-SEP-09
M02	Oceans 13	10-JUL-09

C. U. SHAH UNIVERSITY
Wadhwan City

M03	Armageddon	18-FEB-05
M04	Step up	27-SEP-02
M05	Terminator-3	25-OCT-05

5. Create the table CURRENT1 with the fields (screen_id, movie_id, date_of_arrival, date_of_closure)

Constraints on CURRENT1 table: screen_id references SCREEN table, movie_id references MOVIE, date_of_arrival not null, date_of_closure not null, check for date_of_arrival<date_of_closure.

6. Insert the following records into the table CURRENT1:

SCREEN_ID	MOVIE_ID	DATE_OF_ARRIVAL	DATE_OF_CLOSURE
S1	M01	13-JUL-09	26-AUG-09
S2	M03	25-APR-04	03-MAY-04
S3	M02	05-JAN-09	25-FEB-09
S4	M04	16-MAR-09	20-APR-09
S5	M05	03-MAY-05	09-JUL-05

9

- **Perform the following queries on the tables given in Set no. 8:**
- Get the name of movie which has run the longest in the multiplex so far.**
 - Get the average duration of a movie on screen number 'S4'.**
 - Get the details of movie that closed on date 24-november-2004.**
 - Movie 'star wars III' was released in the 7th week of 2005. Find out the date of its release considering that a movie releases only on Friday.**
 - Get the full outer join of the relations screen and current.**

10

➤ **Create the following tables:**

C. U. SHAH UNIVERSITY
Wadhwan City

1. Create the table DISTRIBUTOR with the fields (DNO, DNAME, DADDRESS, DPHONE)

Constraints on table DISTRIBUTOR: dno primary key, dname not null.

2. Insert the following records into the table DISTRIBUTOR

DNO	DNAME	DADDR	DPHONE
-----	-----	-----	-----
	Hardik	Ode	9315462
D02	Dhaval	Anand	9325135
D03	AAAAOH	Baroda	9563154
D04	Mr. Talkative	Vasad	9321354
D05	Dipen	Thasara	9345432

3. Create the table ITEM1 with the fields (ITEMNO, ITEMNAME, COLOR, WEIGHT)

Constraints on table ITEM1: itemno primary key, itemname not null, check for weight>0

4. Insert the following records into the table ITEM1:

ITEMNO	ITEMNAME	COLOUR	WEIGHT
-----	-----	-----	-----
I01	Screw	Black	20
I02	Bolt	white	100
I03	Nut	red	50
I04	Hammer	green	75
I05	Washer	red	110
I06	Wire	Gray	37
I07	Nail	Green	46

5. Create the table DIST_ITEM with the fields (DNO, ITEMNO, QTY):

Constraints of table DIST_ITEM: dno references DISTRIBUTOR table, itemno references ITEM table

C. U. SHAH UNIVERSITY
Wadhwan City

6. Insert the records into the table DIST_ITEM:

DNO	ITEMNO	QTY
D01	I02	130
D02	I01	500
D03	I05	420
D04	I03	320
D05	I06	160
D02	I04	190
D01	I07	462
D05	I01	256
D03	I04	315

11

➤ **Perform the following queries on the tables given in Set no. 10:**

- 1. Add column CONTACT_PERSON to the distributor table with the not null constraint.**
- 2. Create a view LONDON_DIST on DIST_ITEM which contains only those records where distributors are from London. Make sure that this condition is checked for every DML against this view.**
- 3. Display detail of all those item that have never been supplied. Select * from item1 where itemno not in(select itemno from dist_item) no rows selected.**
- 4. Delete all those items that have been supplied only once.**
- 5. List the names of distributors who have an 'A' and also a 'B' somewhere in their names.**

12

➤ **Perform the following queries on the tables given in Set no. 10:**

- 1. Count the number of items having the same color but not having weight between 20 and 100**
- 2. Display all those distributors who have supplied more than 1000 parts of the same type.**
- 3. Display the average weight of items of same colour provided at least one items have that colour.**
- 4. Display the position where a distributor name has an 'OH' in its spelling somewhere after the forth character.**

C. U. SHAH UNIVERSITY
Wadhwan City

	<p>5. Count the number of distributors who have a phone connection and are supplying item number 'I100'.</p>																																																								
13	<p>➤ Perform the following queries on the tables given in Set no. 10:</p> <ol style="list-style-type: none"> 1. Create a view on the table in such a way that the view contains the distributor name, item name and the quantity supplied. 2. List the name, address and phone number of distributors who have the same three digits in their number as 'Mr. Talkative'. 3. List all distributor names who supply either item I01 or I07 and the quantity supplied is more than 100. 4. Display the data of the top three heaviest ITEMS. 5. Count the total quantity group by itemno. 																																																								
14	<p>➤ Create the following tables:</p> <ol style="list-style-type: none"> 1. Create the table WORKER with the fields (worker_id, name, wage_per_hour, specialized_in, manager_id) Constraints on table WORKER: worker_id primary key, name not null, manager_id primary key, check for wage_per_hour >= 0. 2. Insert the following records into the table WORKER: <table style="width: 100%; border-collapse: collapse; margin-top: 10px;"> <thead> <tr> <th style="text-align: left;">WOR</th> <th style="text-align: left;">NAME</th> <th style="text-align: left;">WAGE_PER_HOUR</th> <th style="text-align: left;">SPECIALISED_IN</th> <th style="text-align: left;">MAN</th> </tr> <tr> <th style="text-align: left;">-----</th> <th style="text-align: left;">-----</th> <th style="text-align: left;">-----</th> <th style="text-align: left;">-----</th> <th style="text-align: left;">-----</th> </tr> </thead> <tbody> <tr> <td>W01</td> <td>Mr.Cacophonix</td> <td>50</td> <td>Polishing</td> <td>M01</td> </tr> <tr> <td>W02</td> <td>Dhaval</td> <td>40</td> <td>Polishing</td> <td>M02</td> </tr> <tr> <td>W03</td> <td>Dipen</td> <td>35</td> <td>Fitting</td> <td>M03</td> </tr> <tr> <td>W04</td> <td>Hardik</td> <td>30</td> <td>Marketing</td> <td>M04</td> </tr> <tr> <td>W05</td> <td>Jigar</td> <td>55</td> <td>Fitting</td> <td>M05</td> </tr> </tbody> </table> 3. Create the table JOB with the fields (job_id, type_of_job, status): 4. Insert the following records into the table JOB: <table style="width: 100%; border-collapse: collapse; margin-top: 10px;"> <thead> <tr> <th style="text-align: left;">JOB</th> <th style="text-align: left;">TYPE_OF_JOB</th> <th style="text-align: left;">S</th> </tr> <tr> <th style="text-align: left;">-----</th> <th style="text-align: left;">-----</th> <th style="text-align: left;">-</th> </tr> </thead> <tbody> <tr> <td>J01</td> <td>Packing</td> <td>A</td> </tr> <tr> <td>J02</td> <td>Editing</td> <td>A</td> </tr> <tr> <td>J03</td> <td>Moulding</td> <td>B</td> </tr> <tr> <td>J04</td> <td>Accounting</td> <td>B</td> </tr> <tr> <td>J05</td> <td>Printing</td> <td>B</td> </tr> </tbody> </table> 	WOR	NAME	WAGE_PER_HOUR	SPECIALISED_IN	MAN	-----	-----	-----	-----	-----	W01	Mr.Cacophonix	50	Polishing	M01	W02	Dhaval	40	Polishing	M02	W03	Dipen	35	Fitting	M03	W04	Hardik	30	Marketing	M04	W05	Jigar	55	Fitting	M05	JOB	TYPE_OF_JOB	S	-----	-----	-	J01	Packing	A	J02	Editing	A	J03	Moulding	B	J04	Accounting	B	J05	Printing	B

19	<p>➤ Perform the following queries on the tables given in Set no. 18:</p> <ol style="list-style-type: none"> Display all the records from the table where state is KARNATAKA. Delete the row from the table where PIN CODE is 576201. Change the ADDRESS as “KAVI MUDDANNA MARG” AND PIN=576104 where CUST_NO=1003. Delete the records of KARNATAKA state from the table and then retrieve all the records back. Select all the records with single occurrence of state from the table. Sort and display the customer data, in the alphabetic order of state. Sort and display the state field in the in descending order. Retrieve records of Karnataka / Kerala customers who are ACTIVE (‘A’). Retrieve rows where name contains the word RAJ embedded it. Display all the rows whose dates are in the range of 10-JAN-70 and 31-JUL-96. 								

Learning Outcomes: -

- Enable the student to model the real world data into database framework.
- Clear understanding of how to map the logical design of database into physical design.
- To get familiar with the SQL query environment..

Books Recommended:-
